

Transform your teaching with Snapplify's suite of products for digital reading and e-learning. Internationally recognised for empowering educators and students to teach and learn, digitally, our award-winning platform is already a top choice for institutions integrating digital education into their classrooms.

READ BOOKS IN ALL 11 SOUTH AFRICAN LANGUAGES

LARGEST CATALOGUE OF LOCAL AND INTERNATIONAL E-TEXTBOOKS IN AFRICA

A secure, collaborative e-learning environment

Engage combines Snapplify's collaborative e-learning products into one platform, so you have easy access to everything you need to teach and learn in the 21st century classroom. Educators can share teacher-created, multimedia **resource materials** with students, while **administrators** seamlessly manage the access and permissions for multiple student and staff accounts.

Users can borrow ebooks for a set period with **Library**, by searching through thousands of titles themselves, or browsing through recommended booklists. Institutions can manage digital Library checkouts with Snapplify's auto-return function, and students and parents can even purchase **prescribed e-textbooks** via the platform. Content is accessible online and offline, and backed up to the Cloud, making learning more accessible and allowing for increased interaction.

Leading schools are using our responsive and interactive e-learning solutions

Insightful analytics of student activity

Data can transform the way we teach. Imagine: You are a teacher who can tell if your students open, read and interact with a textbook, or the class notes you've provided. You can see how much time they're dedicating to their mathematics textbook, and how long they spend on literature and language studies. You can even see which textbooks are not being opened at all. Technology is not only able to enhance, but also to inform the way we teach.

Using Insights, you can track and download data on your students' ebook usage and reading behaviour to analyse how they interact with educational material. Then use this perceptive data to inform your content choices, annual budgets and teaching strategies, so your institution can learn and grow.

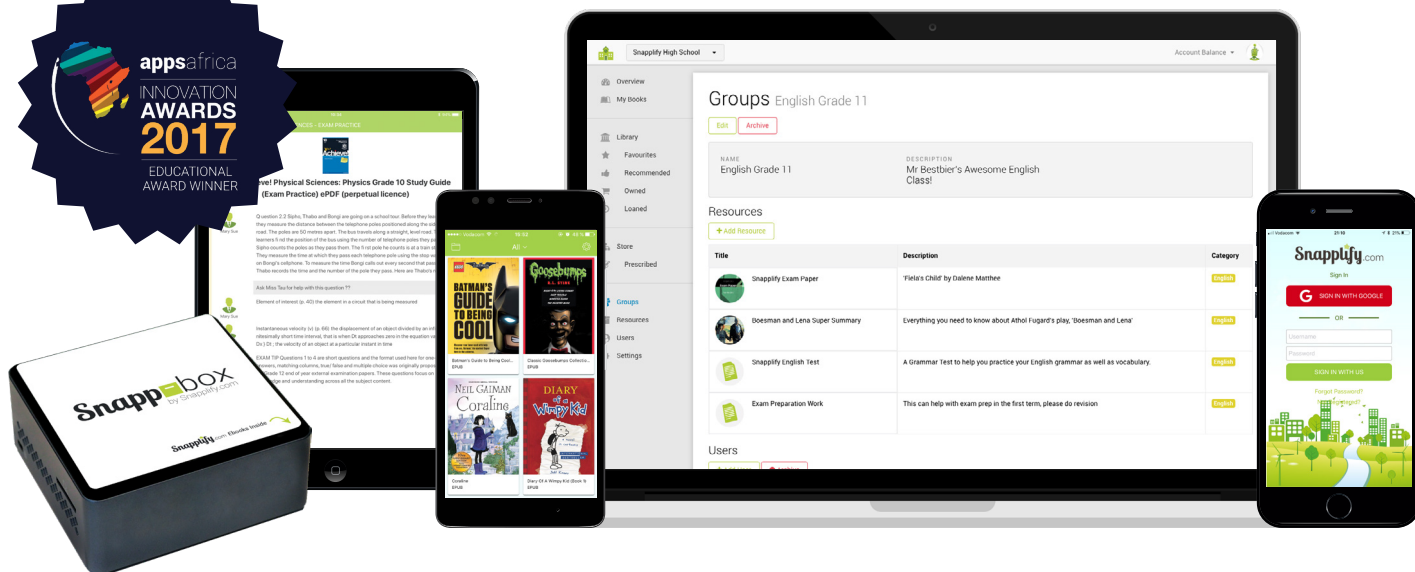

Access to dynamic, interactive content – anywhere

Snapplify's free Reader application can be used on any device and allows you to access all your content in one place. The app can be used online or offline, wherever you are.

Saving data & download time

The award-winning Snappbox is a hardware distribution solution for ebooks, allowing students to access their digital books within their school directly, rather than downloading them each individually from the internet.

Access content in various formats, across multiple platforms

We're here for you

Snapplify is committed to supporting your school and an essential part of this is supporting educators. For schools signed with Snapplify, we offer customised training workshops, as well as ongoing technical support.

Integrated with Google Classroom

If your institution is already using Google Classroom, you can keep things seamless with Snapplify's Google Classroom integration. Users simply log in to the Snapplify platform using their existing Google accounts.
